MAXENCE BLANZAT

ENSEEIHT Engineering Student – Specialising in Embedded Systems

Engineering student at INP-ENSEEIHT, focused on embedded systems and their aerospace and defence applications. Hands-on experience in international logistics. Seeking an embedded systems engineering internship in the defence sector.

Professional experience

Logistics Intern – Logistics Department
July – August 2025 Perfuel Group Canada (Quebec, New Brunswick) and United States (Texas)
Managed logistics flows: stock inbound and outbound, order tracking.
Sourced storage and logistics partners (import, shipping) for bulk and IBC chemical products (fuel additives).

Projects

Inter-school Drone Hackathon – 2nd place
October 2026 French Gendarmerie, Occitanie region AGIR Meetings, Toulouse · ISAE-SUPAERO, ENAC, ENSEEIHT...
Aeris: decision-support tool to size and coordinate drones in gendarmerie operations, prototyped in one day by a team of 6.
Developed the "proposals and operations" front-end (React, TypeScript, Leaflet): comparison of placement scenarios, drone position editing, real-time monitoring.
Pitched to the jury and led the app's visual design.

Education

Master's-level Engineering Degree – INP-ENSEEIHT 2026 – 2029
Toulouse INP Electronics, Electrical Energy and Control Department (3EA)
Intended specialisation: embedded systems
Coursework: electronics, electrical engineering, control systems, signal processing, computer science

Classes Préparatoires (MPSI / PSI) 2024 – 2026
Lycée Chaptal Paris – Two-year intensive programme in maths, physics and engineering; admitted to ENSEEIHT via the national CCINP exam

French Baccalaureate, with honours 2024
Lycée Chaptal Paris – Majors in Mathematics and Physics-Chemistry

Interests

Sports: handball (3 years, ENSEEIHT team), climbing (6 years, 5c–6a), sport shooting (licensed), fencing (foil, 2 years)

Theatre: 3 years

Science and culture: aeronautics, defence industry watch, classical music and opera, photography, cinema
